About us

At Heil Pharma, our commitment lies in pushing healthcare forward with cutting-edge and top-notch pharmaceutical solutions. Our expertise lies in Pre-Filled Syringe (PFS) solutions, concentrating on three vital therapeutic areas: cardiology, gynecology, and ophthalmology.

HPNORIN 40

ENOXAPARIN SODIUM INJECTION BP

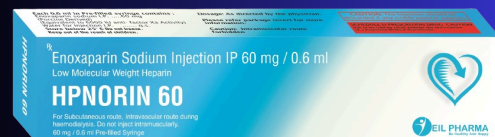

Pack Size: 40mg / 0.4ml
(4000.I.U.antia)

PHARMACO-THERAPEUTICCLASS:

Antithrombotic / Low Molecular Weight Heparin
(B : blood, hematopoietic organs.)

STORAGE PRECAUTIONS:

Store Below 25 Degree Celsius
DO NOT FREEZE

HPNORIN 60

ENOXAPARIN SODIUM INJECTION BP

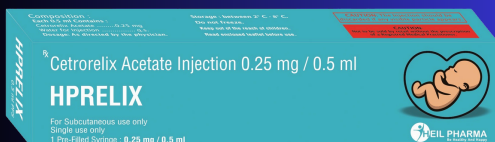

Pack Size: 60mg / 0.6ml
(6000.I.U.antia)

PHARMACO-THERAPEUTICCLASS:

Antithrombotic / Low Molecular Weight Heparin
(B : blood, hematopoietic organs.)

STORAGE PRECAUTIONS:

Store Below 25 Degree Celsius
DO NOT FREEZE

HPRELIX

CETRORELIX ACETATE INJECTION

Pack Size: 0.25mg / 0.5ml

INDICATIONS:

Cetorelix Acetate is indicated for the inhibition of premature LH surges in women undergoing controlled ovarian stimulation.

STORAGE PRECAUTIONS:

Store between 2 Degree to 8 Degree Celsius

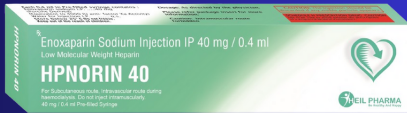

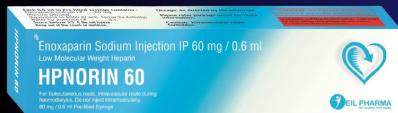

HPFLOX

MOXIFLOXACIN OPHTHALMIC SOLUTION

Pack Size: 50mg / 0.5ml

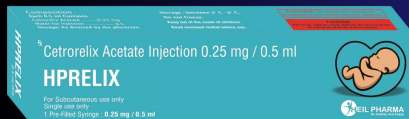

STORAGE PRECAUTIONS:

Store between 2 Degree to 8 Degree Celsius

PRODUCT INFO :

Enoxaparin Sodium Injection (HPNORIN) is a low molecular weight heparin (LMWH) used as an anticoagulant to prevent and treat blood clots. It is administered via subcutaneous injection and is commonly used to prevent deep vein thrombosis (DVT), pulmonary embolism (PE), and in the management of acute coronary syndromes (ACS).

PRODUCT INFO :

Cetorelix acetate injection is a synthetic peptide that acts as a gonadotropin-releasing hormone (GnRH) antagonist. It is used primarily in assisted reproductive technology (ART) to prevent premature ovulation during controlled ovarian stimulation. By inhibiting the secretion of luteinizing hormone (LH) and follicle-stimulating hormone (FSH), cetorelix helps manage the timing of ovulation, enhancing the chances of successful fertilization and implantation.

PRODUCT INFO :

Moxifloxacin Ophthalmic Solution is a pre-filled, sterile solution designed for intraocular use. It contains moxifloxacin, a broad-spectrum fluoroquinolone antibiotic, used to treat bacterial infections of the eye. This convenient pre-filled solution ensures precise dosing and easy administration, making it an effective option for managing ocular infections and promoting optimal eye health.
